

Project Name : MarketMind AI – Small Business Sales Intelligence Platform

1. Project Statement

MarketMind AI is a full-stack AI-powered platform designed to help small businesses monitor and improve their sales performance. It combines business management features with Artificial Intelligence and Machine Learning to provide insights such as sales forecasting, customer segmentation, product recommendations, churn prediction, and anomaly detection. The platform enables businesses to make data-driven decisions and improve profitability.

2. Project Objectives

The primary objective of the MarketMind AI project is to build an AI-powered sales intelligence platform that helps small businesses make data-driven decisions through sales analysis, forecasting, customer insights, and inventory management.

Objectives :

- Build a full-stack AI-powered sales intelligence platform.
 - Monitor sales performance and inventory.
 - Manage invoices and customer information.
 - Forecast future sales using AI/ML.
 - Segment customers based on purchasing behavior.
 - Predict customer churn.
 - Recommend products to customers.
 - Detect unusual sales or inventory activities.
 - Provide interactive dashboards and downloadable reports.
 - Deploy the application using Docker and cloud platforms.
-

3. User Roles

The platform follows Role-Based Access Control (RBAC) and consists of four user roles, each with specific responsibilities and permissions.

3.1. Business Owner

Responsibilities:

- Monitor overall business performance
- View revenue analytics
- View forecasting reports
- View customer intelligence
- Export business reports

Restriction:

- Cannot modify AI model configurations.
-

3.2. Store Manager

Responsibilities:

- Manage inventory
- Monitor daily sales
- Track stock movement
- Review customer activity

Restriction:

- Cannot manage users
 - Cannot access platform administration settings.
-

3.3. Sales Executive

Responsibilities:

- Process sales
- Manage invoices
- Handle customer interactions
- View personal sales reports

Restriction:

- Cannot access forecasting or churn prediction reports
 - Cannot modify inventory policies.
-

3.4. System Administrator

Responsibilities:

- Manage users and roles
- Configure permissions
- Manage datasets
- Configure AI modules
- Manage deployment settings

Restriction:

- None.
